

## Using Your Exported HTML Email Design

Congratulations! You have now successfully exported your Mail Designer 365 email template as HTML to use on your own website or upload to an ESP.

### Your next steps

1. Upload all the images in your design to the server location you specified under "Prefix URLs with" during export. [Learn more](#).
2. Uploading your email design to use with an ESP? [Find the relevant integration guide for your chosen service here](#).

**Important:** If you need to edit any aspect of your design after uploading, please make sure you carry out any changes in Mail Designer 365 and re-export your design when you have finished.

**Stuck?** [Get in touch with our support team](#) - we're always happy to help!
